PERGAMON

ULTRASOUND IN MEDICINE AND BIOLOGY

WORLD FEDERATION FOR ULTRASOUND IN MEDICINE AND BIOLOGY

President: B. B. GOLDBERG, *USA*

Past-President: M. FUKUDA, *Japan*

President-Elect: H. LUTZ, *Germany*

Vice-President I: H. WATANABE, *Japan*

Vice-President II: D. E. ROBINSON, *Australia*

Treasurer: M. C. ZISKIN, *USA*

Secretary: S. HANCKE, *Denmark*

Administrative Councillors:

B. BUTTERY, *Australia*

G. G. CERRI, *Brazil*

H. Y. CHEN, *Taiwan*

S. EIK-NES, *Norway*

C. R. B. MERRITT, *USA*

Co-opted Councillors:

C. A. BRUGUERA, *Argentina*

H. GHARBI, *Tunisia*

M. MAKUUCHI, *Japan*

Editor-in-Chief:

P. N. T. WELLS, *UK*

AFFILIATED SOCIETIES

American Institute of Ultrasound in Medicine (AIUM), A. B. Kurtz, Secretary, 14750 Sweitzer Lane, Suite 100, Laurel, MD 20707, USA

Asian Federation of Societies for Ultrasound in Medicine and Biology (AFSUMB), K. Nakayama, Secretary, Faculty of Science and Technology, Sophia University, 7-1 Kioicho, Chiyoda-ku, Tokyo, Japan

Australasian Society for Ultrasound in Medicine (ASUM), S. Butterworth, Executive Secretary, 2/181 High Street, Willoughby, NSW 2068, Australia

European Federation of Societies for Ultrasound in Medicine and Biology (EFSUMB), L. Surry, Executive Secretary, The Clerestory, 2 Mount Park Road, Ealing, London, W5 2RP, UK

Latin-American Federation of Societies for Ultrasound in Medicine and Biology (FLAUS), G. G. Cerri, Permanent Secretary, Av. Paulista, 491 13° conj. 132, CEP 01311, São Paulo, Brazil

Mediterranean and African Society for Ultrasound (MASU), H. A. Gharbi, President, Hopital d'Enfants, Place Bab Saadoun, 1007 Tunis Jabbari, Tunisia

Societas Internationalis pro Diagnostica Ultrasonica in Ophthalmologia (SIDUO), G. Hasenfratz, Secretary, University Eye Hospital, Wuerzburg, Josef-Schneider-Str. 11, D-8700 Wuerzburg, Germany

South African Medical Ultrasound Society (SAMUS), M. Jacobson, Secretary, Box 93499, Yeoville 2143, Republic of South Africa

AUTHOR/SUBJECT INDEX

A

Aarnink, R. G., Giesen, R. J. B., Huynen, A. L., de la Rosette, J. J. M. C. H., Debruyne, F. M. J. and Wijkstra, H.: a practical clinical method for contour determination in ultrasonographic prostate images, 705

Aarnink, R. G., see Giesen, R. J. B.
Aarnink, R. G., see Huynen, A. L.
Aaslid, R., see Giller, C. A.

Abdominal imaging
in vitro evaluation of three-dimensional ultrasonography in volume estimation of abdominal organs (Gilja), 157

Acoustic parameters
correlation of histology and acoustic parameters of liver tissue on a microscopic scale (van der Steen), 177

Adaptive filter
tissue characterization using intelligent adaptive filter in the diagnosis of diffuse and focal liver disease (Bleck), 521

Adler, R. S., see Chiang, E. H.

Age effects
acoustic velocity and attenuation of eye tissues at 20 MHz (de Korte), 471

Al-Karmi, A. M., Dinno, M. A., Stoltz, D. A., Crum, L. A. and Matthews, J. C.: calcium and the effects of ultrasound on frog skin, 73

Alam, S. K., Richards, D. W. and Parker, K. J.: detection of intraocular pressure change in the eye using sonoelastic Doppler ultrasound, 751

Alasaarela, E. M., Alasaarela, E. L. I. and Räsänen, O.: ultrasound propagation speed in arthritic synovial tissue, 975

Alasaarela, E. L. I., see Alasaarela, E. M.
Allan, P. L., see Loupas, T.
Allard, L., see Guo, Z.
Alpers, C., see Hatsukami, T. S.
Anderson, T., see Loupas, T.
Anderson, T., see Moran, C. M.
Angelsen, B. A. J., see Kiserud, T.

Angle independent Doppler
angle independent Doppler color imaging: determination of accuracy and a method of display (Fei), 147

Angular distribution
quantitative assessment of surface roughness using backscattered ultrasound: the effects of finite surface curvature (Chiang), 123

Angular spectrum
prediction of ultrasonic field propagation through layered media using the extended angular spectrum method (Vecchio), 611

Apfel, R. E., see Jiang, P.
Appleberg, M., see Wilson, L. S.
Aronovitz, J. A., see Hall, A. F.

Arrays
biomedical ultrasound beam forming (Lu), 403

Arrythmia
biological effects of shock waves: induction of arrhythmia in piglet hearts (Delius), 279

Arterial anastamoses
flow imaging in an end-to-side anastomosis model using two-dimensional velocity vectors (Maniatis), 559

Artery
a validation study on the intraobserver reproducibility of transcranial color-coded duplex sonography velocity measurements (Baumgartner), 233
classification of lower limb arterial stenoses from Doppler blood flow signal analysis with time-frequency representation and pattern recognition techniques (Guo), 335
estimates of pulse wave velocity and measurement of pulse transit time in the human cerebral circulation (Giller), 101
flow imaging in an end-to-side anastomosis model using two-dimensional velocity vectors (Maniatis), 559
preliminary results from attenuation-slope mapping of plaque using intravascular ultrasound (Wilson), 529
use of Laplace transform analysis to describe the effect of placental embolisation on umbilical arterial Doppler waveforms in fetal sheep (Stone), 551

Arthur, R. M., see Straube, W. L.
Arts, T. G. J., see Hoeks, A. P. G.

Articular cartilage
quantitative assessment of surface roughness using backscattered ultrasound: the effects of finite surface curvature (Chiang), 123

Atherosclerosis
preliminary results from attenuation-slope mapping of plaque using intravascular ultrasound (Wilson), 529

Attenuation
acoustic velocity and attenuation of eye tissues at 20 MHz (de Korte), 471
an evaluation of overlying tissues to determine fetal exposure to ultrasound during the third trimester (Kamel), 41
correlation of histology and acoustic parameters of liver tissue on a microscopic scale (van der Steen), 177
preliminary results from attenuation-slope mapping of plaque using intravascular ultrasound (Wilson), 529

Automated analysis
analysis of ultrasonographic prostate images for the detection of prostatic carcinoma: the automated urologic diagnostic expert system (Huynen), 1

Axicon
biomedical ultrasound beam forming (Lu), 403

B

Backscatter
a comparison of methods used to calculate ultrasonic myocardial backscatter in the time domain (Moran), 543
acquisition and processing of the radio-frequency signal in echocardiography: a new global approach (Bijnens), 167
analysis of ultrasonic scattering in blood via a continuum approach (Shung), 623
correlation of histology and acoustic parameters of liver tissue on a microscopic scale (van der Steen), 177
experimental assessment of spectrum analysis of ultrasonic echoes as a method for estimating scatterer properties (Hosokawa), 463
on the spectral properties of Doppler thread phantoms (Cathignol), 601
quantitative assessment of surface roughness using backscattered ultrasonic imaging of the stress distribution in elastic media due to an external compressor (Ponnekanti), 27
ultrasound: the effects of finite surface curvature (Chiang), 123

Baert, L., see Pittomvils, G.
Bashein, G., see Detmer, P. R.
Bashein, G., see Hatangadi, R. B.

Bandwidth
biomedical ultrasound beam forming (Lu), 403

Baumgartner, R. W., Mathis, J., Sturzenegger, M. and Mattle, H. P.: a validation study on the intraobserver reproducibility of transcranial color-coded duplex sonography velocity measurements, 233

Beach, K. W., Primozich, J. F. and Strandness, D. E., Jr.: pseudocolor B-mode arterial images to quantify echogenicity of atherosclerotic plaque, 731

Beach, K. W., see Detmer, P. R.
Beach, K. W., see Hatsukami, T. S.
Beach, K. W., see Hodges, T. C.

Beam characterisation
biomedical ultrasound beam forming (Lu), 403
development of standard measurement methods for essential properties of ultrasound therapy equipment (Hekkenberg), 83

Beam forming
biomedical ultrasound beam forming (Lu), 403

Beam profile
biomedical ultrasound beam forming (Lu), 403
lesion development in focused ultrasound surgery: a general model (Hill), 259
the augmentation of leucocyte adhesion to endothelium by therapeutic ultrasound (Maxwell), 383

ultrasound heating in a tissue-bone phantom (O'Neill), 579

Belaïd, N., Cespedes, I., Thijssen, J. M. and Ophir, J.: lesion detection in simulated elastographic and echographic images: a psychophysical study, 877

Berstad, A., see Gilja, O. H.

Bijnens, B., Herregods, M.-C., Nuyts, J., Vandeweghe, G., Suetens, P. and Van de Werf, F.: acquisition and processing of the radio-frequency signal in echocardiography: a new global approach, 167

Bioeffects

an evaluation of overlying tissues to determine fetal exposure to ultrasound during the third trimester (Kamel), 41

calcium and the effects of ultrasound on frog skin (Al-Karmi), 73

biological effects of shock waves: induction of arrhythmia in piglet hearts (Delius), 279

cavitation dosimetry: estimates for single bubbles in a rotating-tube exposure system (Miller), 187

comparison of mouse and rabbit lung damage exposure to 30 kHz ultrasound (O'Brien), 299

current status of research on biophysical effects of ultrasound (Barnett), 205

damage to murine kidney and intestine from exposure to the fields of a piezoelectric lithotripter (Raeman), 589

effect of acoustic streaming on ultrasonic heating (Wu), 195

effects of pulsed ultrasound on the mouse neonate: hind limb paralysis and lung hemorrhage (Frizzell), 53

enhancement of thrombolysis by ultrasound (Olsson), 375

heating as a mechanism for ultrasonically-induced petechial hemorrhages in mouse intestine (Miller), 493

lesion development in focused ultrasound surgery: a general model (Hill), 259

mouse lung damage from exposure to 30 kHz ultrasound (O'Brien), 287

optimum acoustic frequency for focused ultrasound surgery (Hill), 271

shock wave induced endothelial damage—*in situ* analysis by confocal laser scanning microscopy (Seidl), 571

the augmentation of leucocyte adhesion to endothelium by therapeutic ultrasound (Maxwell), 383

ultrasound heating in a tissue-bone phantom (O'Neill), 579

use of Laplace transform analysis to describe the effect of placental embolisation on umbilical arterial Doppler waveforms in fetal sheep (Stone), 551

Biophysical effects

current status of research on biophysical effects of ultrasound (Barnett), 205

Blaas, H.-G., see Kiserud, T.

Bleck, J. S., Gebel, M., Hebel, R., Wagner, S., Schmidt, K., Kruip, S., Westhoff-Bleck, M., Wolf, M., Thiesemann, C. and Manns, M.: tissue characterization using intelligent adaptive filter in the diagnosis of diffuse and focal liver disease, 521

Blood

analysis of ultrasonic scattering in blood via a continuum approach (Shung), 623

Blood flow
classification of lower limb arterial stenoses from Doppler blood flow signal analysis with time-frequency representation and pattern recognition techniques (Guo), 335
contrast echocardiography (Winkelmann), 507
estimation of the pressure gradient across the fetal ductus venosus based on Doppler velocimetry (Kiserud), 225
frequency-dependent properties of cerebral blood transport—an experimental study in anaesthetized rabbits (Czosnyka), 391
on the spectral properties of Doppler thread phantoms (Cathignol), 601

Blood pressure
estimation of the pressure gradient across the fetal ductus venosus based on Doppler velocimetry (Kiserud), 225
frequency-dependent properties of cerebral blood transport—an experimental study in anaesthetized rabbits (Czosnyka), 391

Blood velocity waveforms
use of Laplace transform analysis to describe the effect of placental embolisation on umbilical arterial Doppler waveforms in fetal sheep (Stone), 551

Bom, K., see Li, W.

Bone
effect of acoustic streaming on ultrasonic heating (Wu), 195
ultrasound heating in a tissue-bone phantom (O'Neill), 579

Bone phantom
ultrasound heating in a tissue-bone phantom (O'Neill), 579

Boving, R., see Pittomvils, G.
Brands, P. J., see Hoeks, A. P. G.

Breast cancer
color Doppler flow criteria of breast lesions (Madjar), 849
solid breast neoplasms: differential diagnosis with pulsed Doppler ultrasound (Kuijpers), 517

Brewer, W. H., see Fei, D. Y.

Brezinka, C., DeRuiter, M., Slomp, J., den Hollander, N., Wladimiroff, J. W. and Gittenberger-de Groot, A. C.: anatomical and sonographic correlation of the fetal ductus arteriosus in first and second trimester pregnancy, 219

Bubbles
cavitation dosimetry: estimates for single bubbles in a rotating-tube exposure system (Miller), 187

Bull, S. B., see Stone, P. R.
Burns, D. H., see Detmer, P. R.
Burns, D. H., see Hatsukami, T. S.
Burns, D. H., see Hodges, T. C.
Buschmann, W.: on Nielsen's vessel diameter study, 827L
Buschmann, W.: on Thijssen's historical review, 827L

C

Calcium
calcium and the effects of ultrasound on frog skin (Al-Karmi), 73

Calibration
frequency response of PVDF needle-type hydrophones (Fay), 361
the performance of ultrasound physiotherapy machines in Lothian Region, Scotland, 1992 (Pye), 347
thermoacoustic sensor for ultrasound power measurements and ultrasonic equipment calibration (Fay), 367

Cancer
analysis of ultrasonographic prostate images for the detection of prostatic carcinoma: the automated urologic diagnostic expert system (Huynen), 1
color Doppler flow criteria of breast lesions (Madjar), 849
Canfield, D. R., see Tarantal, A. F.

Cardiology
anatomical and sonographic correlation of the fetal ductus arteriosus in first and second trimester pregnancy (Brezinka), 219
the geometrical relationship between the human esophagus and left ventricle: implications for three-dimensional ultrasonic scanning (Hatangadi), 11

Carotid artery
estimates of pulse wave velocity and measurement of pulse transit time in the human cerebral circulation (Giller), 101

Carstensen, E. L., see del Cerro, M.
Carstensen, E. L., see Raeman, C. H.
Cathignol, D., Dickerson, K., Newhouse, V. L., Faure, P. and Chapelon, J.-Y.: on the spectral properties of Doppler thread phantoms, 601

Cavitation
a simple simulation for the visualisation of CSF flow in infants with hydrocephalus (Perkins), 21
biological effects of shock waves: induction of arrhythmia in piglet hearts (Delius), 279
calcium and the effects of ultrasound on frog skin (Al-Karmi), 73
cavitation dosimetry: estimates for single bubbles in a rotating-tube exposure system (Miller), 187
comparison of mouse and rabbit lung damage exposure to 30 kHz ultrasound (O'Brien), 299
contrast echocardiography (Winkelmann), 507
current status of research on biophysical effects of ultrasound (Barnett), 205
effects of pulsed ultrasound on the mouse neonate: hind limb paralysis and lung hemorrhage (Frizzell), 53
heating as a mechanism for ultrasonically-induced petechial hemorrhages in mouse intestine (Miller), 493
mouse lung damage from exposure to 30 kHz ultrasound (O'Brien), 287
optimum acoustic frequency for focused ultrasound surgery (Hill), 271
use of Laplace transform analysis to describe the effect of placental embolisation on umbilical arterial Doppler waveforms in fetal sheep (Stone), 551

Cavitation index
current status of research on biophysical effects of ultrasound (Barnett), 205

Cell lysis
cavitation dosimetry: estimates for single bubbles in a rotating-tube exposure system (Miller), 187

Cerebral artery
a validation study on the intraobserver reproducibility of transcranial color-coded duplex sonography velocity measurements (Baumgartner), 233
frequency-dependent properties of cerebral blood transport—an experimental study in anaesthetized rabbits (Czosnyka), 391

Cerebral flow
frequency-dependent properties of cerebral blood transport—an experimental study in anaesthetized rabbits (Czosnyka), 391

del Cerro, M., Child, S. Z., Raeman, C. H., Carstensen, E. L. and Miller, M. W.: a test of the hypothesis that diagnostic ultrasound disrupts myelination in neonatal rats, 981

Cespedes, I., see Belaïd, N.
Cespedes, I., see Ponnekanti, H.

CFS
a simple simulation for the visualisation of CSF flow in infants with hydrocephalus (Perkins), 21

Chandwaney, R. H., see Winkelmann, J. W.
Chapelon, J.-Y., see Cathignol, D.
Chen, E., see Frizzell, L. A.
Chiang, E. H., Adler, R. S., Meyer, C. R., Rubin, J. M., Dedrick, D. K. and Laing, T. J.: quantitative assessment of surface roughness using backscattered ultrasound: the effects of finite surface curvature, 123

Child, S. Z., see Raeman, C. H.
Cloutier, G., see Guo, Z.
Cobbold, R. S. C., see Maniatis, T. A.
Collecutt, T., see Maxwell, L.

Color flow mapping
a perfusion phantom for the evaluation of ultrasound contrast agents (Hindle), 309
a validation study on the intraobserver reproducibility of transcranial color-coded duplex sonography velocity measurements (Baumgartner), 233
anatomical and sonographic correlation of the fetal ductus arteriosus in first and second trimester pregnancy (Brezinka), 219
angle independent Doppler color imaging: determination of accuracy and a method of display (Fei), 147
color Doppler flow criteria of breast lesions (Madjar), 849
flow imaging in an end-to-side anastomosis model using two-dimensional velocity vectors (Maniatis), 559
two-dimensional velocity reconstruction strategies for color flow Doppler ultrasound images (Maniatis), 137
ultrasound contrast agents: a review (Goldberg), 319

Computer modelling
development of standard measurement methods for essential properties of ultrasound therapy equipment (Hekkenberg), 83
two-dimensional velocity reconstruction strategies for color flow Doppler ultrasound images (Maniatis), 137

Confocal laser scanning microscope
shock wave induced endothelial damage—*in situ* analysis by confocal laser scanning microscopy (Seidl), 571

Contrast agents
a perfusion phantom for the evaluation of ultrasound contrast agents (Hindle), 309
contrast echocardiography (Winkelmann), 507
ultrasound contrast agents: a review (Goldberg), 319

Conzen, P., see Delius, M.

Cranial Doppler
a simple simulation for the visualisation of CSF flow in infants with hydrocephalus (Perkins), 21

Crum, L. A., see Al-Karmi, A. M.
Czosnyka, M., Richards, H., Pickard, J. D., Harris, N. and Iyer, V.: frequency-dependent properties of cerebral blood transport—an experimental study in anaesthetized rabbits, 391

Delius, M., Hoffman, E., Steinbeck, G. and Conzen, P.: biological effects of shock waves: induction of arrhythmia in piglet hearts, 279

Delius, M., Ueberle, F. and Gambihler, S.: destruction of gallstones and model stones by extracorporeal shock waves, 251

Demodulation
effect of sample window length on the correlation between RF signal and pulsed Doppler signal intensity (Hoeks), 35

DeRuiter, M., see Brezinka, C.
Detmer, P. R., Bashein, G., Hodges, T., Beach, K. W., Filer, E. P., Burns, D. H. and Strandness, D. E., Jr.: 3D ultrasonic image feature localization based on magnetic scanhead tracking: *in vitro* calibration and validation, 923

Detmer, P. R., see Hatsukami, T. S.
Detmer, P. R., see Hodges, T. C.

Diastole
automated method for characterization of diastolic transmitral Doppler velocity contours: early rapid filling (Hall), 107

Dickerson, K., see Cathignol, D.

Digital filters
development of an advanced digital image processor for real-time speckle suppression in routine ultrasonic scanning (Loupas), 239

Dinno, M. A., see Al-Karmi, A. M.

Doppler
a perfusion phantom for the evaluation of ultrasound contrast agents (Hindle), 309
a real-time and fine resolution analyser used to estimate the instantaneous energy distribution of Doppler signals (Fan), 445
a simple simulation for the visualisation of CSF flow in infants with hydrocephalus (Perkins), 21
a study of the heating capabilities of diagnostic ultrasound beams (Duck), 481
a validation study on the intraobserver reproducibility of transcranial color-coded duplex sonography velocity measurements (Baumgartner), 233
anatomical and sonographic correlation of the fetal ductus arteriosus in first and second trimester pregnancy (Brezinka), 219
angle independent Doppler color imaging: determination of accuracy and a method of display (Fei), 147
automated method for characterization of diastolic transmitral Doppler velocity contours: early rapid filling (Hall), 107
classification of lower limb arterial stenoses from Doppler blood flow signal analysis with time-frequency representation and pattern recognition techniques (Guo), 335
color Doppler flow criteria of breast lesions (Madjar), 849
comparison of the performance of three maximum Doppler frequency estimators coupled with different spectral estimation methods (Marasek), 629
effect of sample window length on the correlation between RF signal and pulsed Doppler signal intensity (Hoeks), 35
estimates of pulse wave velocity and measurement of pulse transit time in the human cerebral circulation (Giller), 101
estimation of the pressure gradient across the fetal ductus venosus based on Doppler velocimetry (Kiserud), 225
extracting instantaneous mean frequency information from Doppler signals using the Wigner distribution function (Fan), 429
flow imaging in an end-to-side anastomosis model using two-dimensional velocity vectors (Maniatis), 559
frequency-dependent properties of cerebral blood transport—an experimental study in anaesthetized rabbits (Czosnyka), 391
on the spectral properties of Doppler thread phantoms (Cathignol), 601
processing Doppler ultrasound signals from blood-borne emboli (Smith), 455
solid breast neoplasms: differential diagnosis with pulsed Doppler ultrasound (Kuijpers), 517
ultrasound contrast agents: a review (Goldberg), 319
use of Laplace transform analysis to describe the effect of placental embolisation on umbilical arterial Doppler waveforms in fetal sheep (Stone), 551

Doppler bandwidth
on the spectral properties of Doppler thread phantoms (Cathignol), 601

Doppler imaging
angle independent Doppler color imaging: determination of accuracy and a method of display (Fei), 147

Doppler spectrum
on the spectral properties of Doppler thread phantoms (Cathignol), 601

Dosimetry
an evaluation of overlying tissues to determine fetal exposure to ultrasound during the third trimester (Kamel), 41
cavitation dosimetry: estimates for single bubbles in a rotating-tube exposure system (Miller), 187

Duck, F. A. and Starritt, H. C.: a study of the heating capabilities of diagnostic ultrasound beams, 481

Durand, L.-G., see Guo, Z.

Dynamic focusing
biomedical ultrasound beam forming (Lu), 403

E

Ebben, G. P. J., see van der Steen, A. F. W.

Echocardiography
acquisition and processing of the radio-frequency signal in echocardiography: a new global approach (Bijnens), 167
automated method for characterization of diastolic transmitral Doppler velocity contours: early rapid filling (Hall), 107
contrast echocardiography (Winkelmann), 507
the geometrical relationship between the human esophagus and left ventricle: implications for three-dimensional ultrasonic scanning (Hatangadi), 11

Edgar, S., see Maxwell, L.
Eik-Nes, S. H., see Kiserud, T.
El Yafi, W., see Veyrat, C.

Elastic modulus
ultrasonic imaging of the stress distribution in elastic media due to an external compressor (Ponnekanti), 27

Elastography
ultrasonic imaging of the stress distribution in elastic media due to an external compressor (Ponnekanti), 27

Endocardium
the geometrical relationship between the human esophagus and left ventricle: implications for three-dimensional ultrasonic scanning (Hatangadi), 11

Endosonography
analysis of ultrasonographic prostate images for the detection of prostatic carcinoma: the automated urologic diagnostic expert system (Huynen), 1
the geometrical relationship between the human esophagus and left ventricle: implications for three-dimensional ultrasonic scanning (Hatangadi), 11

Endothelium
shock wave induced endothelial damage—*in situ* analysis by confocal laser scanning microscopy (Seidl), 571

the augmentation of leucocyte adhesion to endothelium by therapeutic ultrasound (Maxwell), 383

Errors
angle independent Doppler color imaging: determination of accuracy and a method of display (Fei), 147
automated method for characterization of diastolic transmitral Doppler velocity contours: early rapid filling (Hall), 107
comparison of the performance of three maximum Doppler frequency estimators coupled with different spectral estimation methods (Marasek), 629
in vitro evaluation of three-dimensional ultrasonography in volume estimation of abdominal organs (Gilja), 157
two-dimensional velocity reconstruction strategies for color flow Doppler ultrasound images (Maniatis), 137

Erythrocyte
analysis of ultrasonic scattering in blood via a continuum approach (Shung), 623

ESWL
damage to murine kidney and intestine from exposure to the fields of a piezoelectric lithotripter (Raeman), 589
destruction of gallstones and model stones by extracorporeal shock waves (Delius), 251
guidelines for the safe use of extracorporeal shock-wave lithotripsy (ESWL) devices. Statement from the Radiation Safety Committee of the European Federation of Societies for Ultrasound in Medicine and Biology, 315
shock wave induced endothelial damage—*in situ* analysis by confocal laser scanning microscopy (Seidl), 571

Evans, D. H., see Fan, L.
Evans, D. H., see Martin, P. J.
Evans, D. H., see Smith, J. L.

Exposure
an evaluation of overlying tissues to determine fetal exposure to ultrasound during the third trimester (Kamel), 41
cavitation dosimetry: estimates for single bubbles in a rotating-tube exposure system (Miller), 187
damage to murine kidney and intestine from exposure to the fields of a piezoelectric lithotripter (Raeman), 589
effect of acoustic streaming on ultrasonic heating (Wu), 195
effects of pulsed ultrasound on the mouse neonate: hind limb paralysis and lung hemorrhage (Frizzell), 53
enhancement of thrombolysis by ultrasound (Olsson), 375
heating as a mechanism for ultrasonically-induced petechial hemorrhages in mouse intestine (Miller), 493
lesion development in focused ultrasound surgery: a general model (Hill), 259
shock wave induced endothelial damage—*in situ* analysis by confocal laser scanning microscopy (Seidl), 571
the augmentation of leucocyte adhesion to endothelium by therapeutic ultrasound (Maxwell), 383
thermoacoustic sensor for ultrasound power measurements and ultrasonic equipment calibration (Fay), 367

ultrasound heating in a tissue-bone phantom (O'Neill), 579
use of Laplace transform analysis to describe the effect of placental embolisation on umbilical arterial Doppler waveforms in fetal sheep (Stone), 551

Eye
acoustic velocity and attenuation of eye tissues at 20 MHz (de Korte), 471

F

Fan, L. and Evans, D. H.: a real-time and fine resolution analyser used to estimate the instantaneous energy distribution of Doppler signals, 445

PROGRESS IN NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY

Executive Editors: **J.W. Emsley**, *Department of Chemistry, University of Southampton, Southampton SO9 5NH, UK* and **J. Feeney**, *National Institute for Medical Research, Mill Hill, London NW7 1AA, UK*
Consultant Editor: **L.H. Sutcliffe**, *Chemistry and Physics Department, University of Surrey, Guildford, Surrey GU2 5XH, UK*

Audience: Analytical Chemists

AIMS AND SCOPE
NMR spectroscopy is being applied with increasing success in chemistry, physics, biochemistry, materials science, and also in many areas of biology and medicine. This journal publishes review articles covering applications in all these and related subjects, as well as in-depth treatments of the fundamental theory and instrumental developments of NMR spectroscopy. The issuing of each volume in separate parts ensures the rapid appearance of the reviews, and thus gives readers the most up to date coverage of the subject.

BIO-MEDICAL MATERIALS AND ENGINEERING

An International Journal

Editor-in-Chief: **T. Yokobori**, *School of Science & Engineering, Teikyo University, Toyosatodai 1-1, Utsunomiya 320, Japan*
Honorary Editors: **E.Y.S. Chao**, *Mayo Clinic, USA* and **Y. Nosé**, *Texas Medical Center, USA*
Executive Editors: **H. Aoki**, *Tokyo Medical and Dental University, Japan*, **C.R. McMillin**, *AcroMed Corporation, USA* and **A.T. Yokobori, Jr**, *Tohoku University, Japan*

Audience: Materials scientists, biomedical engineers.

AIMS AND SCOPE
Bio-medical Materials and Engineering is an interdisciplinary journal that publishes original research papers, review articles and brief notes on materials and engineering for biological and medical systems. Articles in this peer-reviewed journal cover a wide range of topics, including, but not limited to: engineering as applied to improving diagnosis, therapy and prevention of disease, and better substitutes for damaged or disabled human organs, emphasizing the integration of bioengineering and clinical practice; studies of biomaterial interactions with the human body, bio-compatability, interfacial and interaction problems; biomechanics, bio-medical mechanics, clinical mechanics and mechanical behaviour; physiological, biophysical and biochemical aspects of bioengineering; advanced inorganic biomaterials and composite biomaterials and evaluation; biosensors; biomedical devices, systems and artificial organs, including systems analysis; biomimetics; *in vitro* testing methods; evaluation of stress corrosion cracking and fatigue *in vivo* conditions; tribology and wear; implant failure fields and degradation of implants; assessment of reliability and safety of biomaterials used clinically *in vivo* and *ex vivo;* standardization of biomaterials; liability of biomaterials and related products; bioengineering and materials in the areas of biotechnology, as applied to genetic engineering, bioreactors, bioprocess instrumentation and control systems. Materials discussed may include: metal and alloys, ceramics, polymers, composites, reprocessed animal tissues, natural tissues and living tissues.

A Selection of Papers
L.H. YAHIA, G. DROUIN, D. ZUKOR (Canada), The irradiation effect on the initial mechanical properties of meniscal grafts.
M.A. BABIZHAYEV, N. CHUMAYEVSKII (Russia), Tinting effect of ultraviolet radiation on intraocular lenses of polymethyl methacrylate.
Y.S. KIM, Y.H. KANG, J.K. KIM, J.B. PARK (USA), Effect of bone mineral particles on the porosity of bone cement.
T.YOKOBORI JR, T. OHKUMA, S. SASAKI, H. YOSHINARI, T.YOKOBORI, H. OHUCHI, S. MORI (Japan), Algorithm of the noninvasive diagnosis method on the atherosclerosis by ultrasonic Doppler effect.
H.-J. KIM, R.S. BENSON (USA), The effects of soft segment structure on the fatigue crack propagation of model polyurethanes.
K. ALBERT (USA), **R. SCHLEDJEWSKI** (Germany), **M. HABAUGH, S. BLESER, R. JAMISON** (USA), **K. FRIEDRICH** (Germany), Characterization of wear in composite material orthopaedic implants part II: the implant/bone interface.

EXPANDED AIMS AND SCOPE!

LIFE SCIENCES

Including Pharmacology Letters

Editor-in-Chief
RUBIN BRESSLER, MD
The University of Arizona, Health Sciences Center,
Department of Pharmacology,
1501 North Campbell Avenue, Tucson, AZ 85724, USA

Executive Editor/Europe
SALOMON Z. LANGER, MD
Vice-President, Director of Research,
SYNTHELABO Recherche (L.E.R.S.),
92225 Bagneux, France

Co-Editors of **Pharmacology Letters** Section:
ROBERT B. RAFFA, R.W. Johnson, PRI, USA, & **FRANK PORRECA**, The University of Arizona Health Sciences Center, USA

LIFE SCIENCES is an international journal publishing full-length reports on research in a range of areas in the life sciences. These areas emphasize the molecular and cellular aspects of: *Cardiovascular & Autonomic Mechanisms; Drug Metabolism; Endocrinology; Growth Factors and Neoplasia; Immunology; Neuroscience; Toxicology*. The Journal publishes original research rapidly — acceptance to publication is just four weeks. In addition to full-length papers, the Journal also features a special section, **Pharmacology Letters**, which includes brief (4 to 6 pages) experimental studies of immediate interest on any aspect of basic pharmacology. **Pharmacology Letters** also offers a rapid publication time of 4 weeks. All papers are rigorously reviewed.

RECENT PAPERS:

A.H. Andres, M.L. Rao, S. Ostrowitzki, W. Entzian (Germany), Human brain cortex and platelet serotonin$_2$ receptor binding properties and their regulation by endogenous serotonin.

M. Zehetgruber (Austria), A. Conforto, R.J. Bing (USA), Vascular smooth muscle and nitric oxide.

MINI-REVIEWS:

J. Mendlewicz, S. Sevy, K. Mendelbaum (Belgium), Molecular genetics in affective illness.

T.W. Moody, F. Cuttitta (USA), Growth factor and peptide receptors in small cell lung cancer.

PHARMACOLOGY LETTERS:

J.H. Trouvin, A.M. Gardier, E. Chanut, N. Pages, C. Jacquot (France), Time course of brain serotonin metabolism after cessation of long-term fluoxetine treatment in the rat.

H. Nagai, Y. Takaoka, H. Kamada, H. Mori (Japan), The model of arthritis induced by superantigen in mice.

Computerized Medical Imaging and Graphics is an important source for the latest information on the medical use of new computer applications in radiological imaging, 3-D imaging and microscopy, including research methods and results in CT, MR, PET, SPECT, digital radiology, DSA, ultrasound, confocal microscopy, 3-D reconstruction, image analysis and color analysis. The Journal provides for the rapid review of original research papers, review articles, and preliminary research publications in this important field.

Nuclear Medicine - and - Biology

- Radiopharmaceutical Chemistry
- *In Vivo* Biochemistry
- *In Vivo* Validation Studies
- Nuclear and Radiation Biology

EDITOR-IN-CHIEF: **WILLIAM C. ECKELMAN,** *Rm 1C-401, Bldg. 10, Clinical Center, NIH, 9000 Rockville Pike, Bethesda, MD, 20892, USA*

AIMS & SCOPE: Published 8 issues per annum, **Nuclear Medicine and Biology** features original research contributions describing *in vitro* tissue studies and *in vivo* use of radiotracers, radiopharmaceuticals and therapeutic agents. Papers concentrate on the synthesis, testing *in vitro*, and examination of a compound *in vivo*. Extensive studies proving the mechanism of localization *in vivo* whether the radioactive substance is based on receptor-, enzyme-, or tumor antigen-binding or other well defined processes are an integral part of each evaluation. Additionally, studies should define a significant compound that is a sensitive probe of a biochemical change *in vivo*.
